Context and Content

The National Assessment and Accreditation Council, New Delhi (NAAC) has made it mandatory from the academic year 2016–17 onwards that all Higher Educational Institutions should submit an annual Green/Environment Audit Report. Moreover, it is part of the Corporate Social Responsibility of the Higher Educational Institutions to ensure that they contribute towards the reduction of global warming through Carbon footprint reduction measures.

In view of the NAAC circular regarding Green Auditing, the College Management decided to conduct an external Green Evaluation by a competent Auditor along with a Green Audit Assessment Team headed by Dr. R. S. Tomar – Chairman & Director, IMIRC College of Law, CCS University - Meerut. Green Audit focuses on the Green Campus, Waste Management, Water Management, Air Pollution, Energy Management & Carbon footprint etc. being implemented by the College Management. The concepts, structure, objectives, methodology, tools of analysis, objectives of the audit are discussed below.

Introduction

A Nation's growth starts from its educational institutions, where the ecology is thought as a prime factor of development associated with the environment. Educational institutions now a day are becoming more sensitive to environmental factors and more concepts are being introduced to make them eco-friendly.

To preserve the environment within the campus, various viewpoints are applied by the several educational institutes to solve their environmental problems such as promotion of energy savings, recycle of waste water, waste water reduction, rain water harvesting etc. The activities pursued by colleges can also create a variety of adverse environmental impacts.

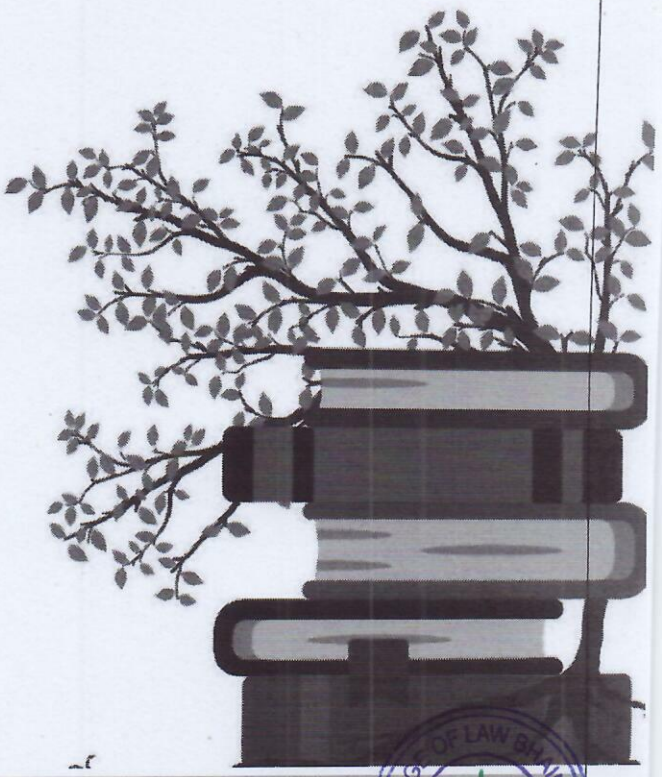

The green audit is a way to show businesses what type of carbon footprint they are leaving on the planet, while also giving them ways to reduce it. A green audit involves the inspection of a company to assess the total environmental impact of its activities, or a particular product or a process.

The green audits are tools that organizations use to identify their environmental impacts and assess their compliance with applicable laws and regulations, as well as with the expectations of their various stakeholders. It also serves as a means to identify opportunities to save money, enhance work quality, improves employee health, safety and morale, reduce liabilities and achieve other forms of business values.

The Green audit can be a useful tool for a college to determine how and where they are using the most energy or water or resources; the college can then consider how to implement changes and make savings. It can also be used to determine the type and volume of waste, which can be used for a recycling project or to improve the waste minimization plan.

Green auditing and the implementation of mitigation measures is a win-win situation for the entire college, the learners and the planet.

It can also create health consciousness and promote environmental awareness, values and ethics. It provides staff and students with a better understanding of Green impact on campus.

Executive Summary

The Green audit is a snapshot in time, in which one assesses campus performance in complying with green initiatives by college campus. Though a helpful benchmark, the audit almost immediately becomes outdated unless there is some mechanism in place to continue the effort of monitoring environmental compliance.

This is the First external audit of the institute for NAAC affiliation; QS Program and doing their bit towards environmental protection and environmental awareness at the local and global front. Audit criteria are environmental cognizance, waste minimization and management, biodiversity conservation, water conservation, energy conservation and environmental legislative compliance by the campus. A questionnaire is used during the audit. This audit report contains observations and recommendations for the improvement of environmental consciousness based on the following parameters:

Recommendations

- Eco-friendly parameters should be included in the purchase of articles and goods for the campus.
- Bore well water meter must be installed at the institute for monitoring the water consumption per capita in each block.
- Increase in promotional activities for spreading awareness about energy savings and environmental awareness at the campus.
- Plant Ownership Program should be initiated – Several Trees should be planted and owned by visitors as well as students. The names of such visitors / students should also be displayed near the plants.
- Green building guidelines should be followed for future expansion projects of the College.

Conclusion

This green audit involved extensive detailed interview process with the different teams in college, interactions with key personnel on a wide range of issues related to Environmental Management System (EMS). Shyam Lal College, University of Delhi has around 60% of the college campus for landscaping. The audit team has identified a few observations for making the college campus more environmental friendly and greener. The recommendations are also mentioned with observations for the college campus team to initiate actions.

The audit team opines that the overall site is maintained well from an environmental perspective. There are no major observations but few things that are important to initiate urgently are waste management plan including composting, water balancing/ audit. College management should go for ECBC compliance for all future building expansions.

Transparency of Green Audit Report

The green audit report is one of the useful means of demonstrating an organization's commitment to openness and transparency. If an organization believes it has nothing to hide from its stakeholders, then it should feel confident enough to make its green audit reports freely available to those who request them. As a basic rule, green audit reports should be made available to all stakeholders.
